

# WWK 300

## ABOUT

The WWK hot water heat pump is designed for use in domestic and commercial buildings. By recovering energy from the air around it, this small heat pump raises the temperature of water to 60°C. The 'plug and play' technology means it is suitable for any property no matter what age or condition. In no time at all you can start to save money and CO<sup>2</sup>.

## KEY FEATURES

- 75% Energy from the environment
- +60°C Water temperature
- 'Plug & Play' technology
- Extremely low heat loss
- German engineering
- Suitable for property of any age
- Reduce carbon emissions by up to 50%
- Ideal alternative to traditional fossil fuel boilers

Steibel Eltron water heaters all come with a x year comprehensive warranty.
